

EID Tag Reader Options

£195 + VAT

The I-Read is an economical EID Reader that can scan livestock EIDs, store the list on the reader and download it to your PC. This type is very useful for scanning large groups of animals, particularly when they come on or leave your holding, to update your Total Starter or Standard Sheep software or SheepTrac software.

**From
£475 + VAT**

The Allflex EID Stick Reader is a very robust tool that can scan livestock EIDs, store the list on the reader and download it to your PC. This type is again very useful for scanning large groups of animals, particularly when they come on or leave your holding, to update your Total Starter or Standard Sheep software or SheepTrac software.

**From
£695 + VAT**

The Agrident APR500 EID Logger is a tool that lets you record data against an EID Tag as you scan it. This could mean a drug treatment, lambing, movement etc. Furthermore you can select the task and then scan a batch of animals against that single task then the data can be downloaded into the Total Standard Sheep Management Software.
