Total Accounts your farm accounts solution

٤II

# SUM-IT's Total Accounts Program paves the way to simplified book-keeping for farms and other diversified rural businesses, operating as either a full accounts package or a Cash Book.

It aids management decision-making through extensive reporting facilities and saves time (and Accounts "Donkey work") with semi-automated bank reconciliation, automatic VAT and Year-End Reporting. The program's unique ability to integrate seamlessly with the physical stock records in the Total Enterprise Modules Suite

provides a full upgrade path when required.

- Choose to input your invoices before or after they're paid
- Calculate your VAT return instantly and submit on-line direct to HMRC MTD portal
- Process Self-Billing Contra Invoices painlessly
- Always know your current Debtors and Creditors
- Monitor your **bank balance** at all times
- Minimise Accountant's work and increase productivity

SUM-IT Computer Systems Ltd. Samuel House, Chinnor Road, Thame,

Oxfordshire, OX9 3NU

The most important hallmark for all SUM-IT's Total programs, is that for all they provide, they are SIMPLE-TO-USE. They have all been written with the User in mind, gaining the maximum output from the minimum input and requiring no previous knowledge of computers to operate them. With any Total Module purchase receive three months of Gold Level support completely free, this includes support calls on a non-premium landline and weekly online back-ups of your data.

# **Optional Modules & Equipment**

All optional modules include posting to Accounts where relevant. All Total Modules: Beef, Dairy, Field, Sheep, Payroll and Contractor's Diary integrate seamlessly with Total Accounts.

### **Invoicing Module**

Generates customer invoices direct from Total Standard Accounts. Customised headers and footers can be added to avoid ordering expensive stationery in.

## **Contractor's Diary Module**

A facility to raise quotes, orders, job cards and delivery notes, storing customer records through the complete quote to invoicing process. Invoice runs automatically raise invoices from work done or goods delivered.

## **Total Payroll Module**

Caters for a variety of wage calculation needs within agriculture and other business types. It calculates Tax and National Insurance, prints full payslips, producing all figures required for month and year-end returns as well as Pension payments.

#### **Electronic Invoice Storage Module**

Store scanned paper invoices and imported electronic invoices against Total Accounts entries for easy data entry and access at anytime.

## **PC Banking Module**

Exports payment details from Total Accounts across to most PC Banking programs to eliminate duplication of entering the details into both programs. Please note this does not generally include free Internet Banking services as they do not have Import facilities.

#### **Cheque Printing Module**

Print payment details directly onto normal cheques or Remittance Notes with a tear-off cheque portion at the bottom. Different styles can be catered for.

#### **Deadstock Control Module**

Keeps a tally of specific deadstock items as they are bought and sold. A flexible stock-take process ensures you keep everything aligned.

#### **Hardware Requirements**

Total operates on Windows 10 and Windows Server and will require 500MB of Hard Disk capacity plus an occasional internet connection to receive program updates and communicate with HMRC and BCMS. Hardware should have a minimum of 4GB Ram.
