Total Cattle App
access records offline wherever you are
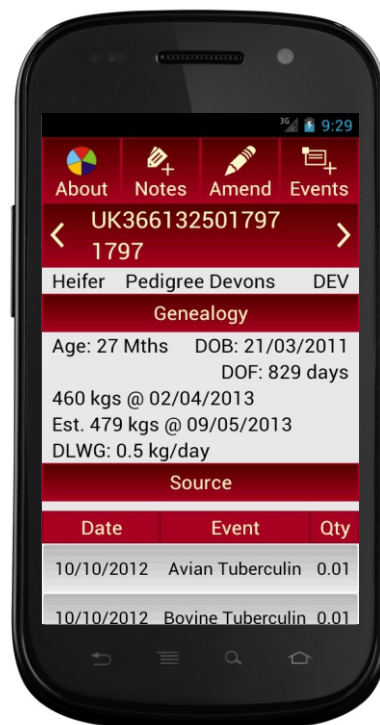

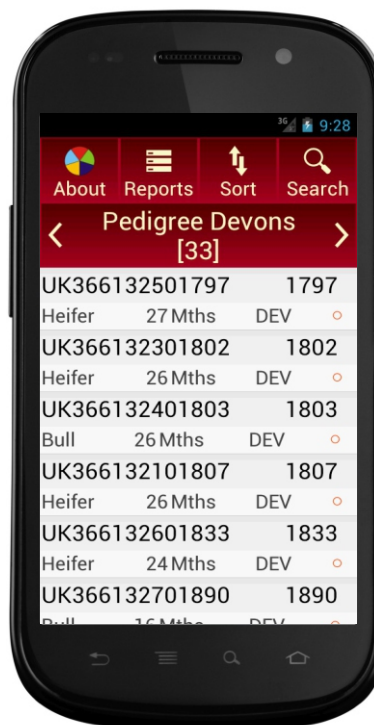

SUM-iT
AGRICULTURAL SOFTWARE

Save desk time updating computer records with the day's activities. The Total Cattle App for all Android Smartphones and Tablets enables you to take your Total Cattle data offline outside to view your herd's details and record new events as they happen. Sync computer/device data via Wi-Fi at any time when in the office.

Total Cattle Android App for Beef and Dairy Herds

Designed to run with both Starter and Standard Total Beef and Total Dairy Modules

Features include:

- Displays full herd list or select by group
- Search on any part of Ear Tag or Code
- Drill down to detailed individual records
- See full identification and past events
- View Pedigrees in an instance
- Identify if animals are in drug withdrawal

Add new events:

- Calvings
- Bullings
- Services
- PD's

- Health Treatments
- Weights
- Milk Yields/Recording
- Group Changes

Synchronises with Total software records on farm office PC via WiFi at any time.
Multiple ANDROID Devices can synchronise to one Total Data Set.
Alternatively up to 5 Datasets can be operated on any single ANDROID Device.
