Total Beef
your cattle management solution

SUM-IT AGRICULTURAL SOFTWARE

SUM-IT's Total Beef program is designed as a complete enterprise management tool to aid with practical day-to-day running as well as the increasing regulatory, traceability and assurance obligations of the industry.
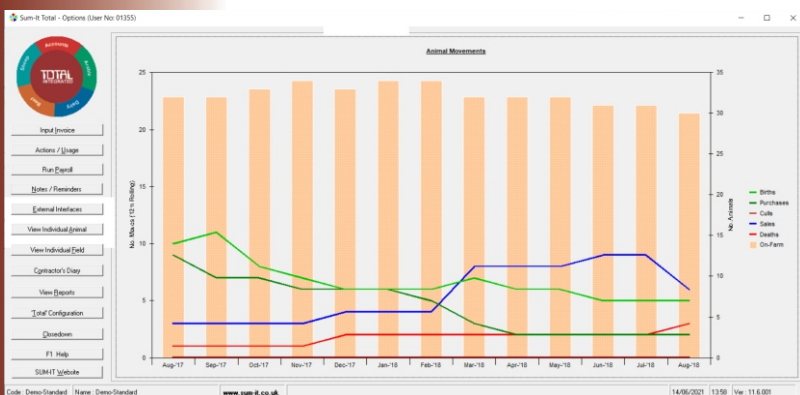

The module provides full enterprise profit analysis, maintains NOAH medicine use records and handles cattle movements and births. The program's unique ability to integrate seamlessly with the Total Accounts Module provides full upgradability and Total business management when required.

- **Individual animal records** provide full identification tags, genealogy and actions
- Automatically maintain full **unlimited pedigree records** and **register calves** with Societies using **BREEDPLAN**
- Weighing sessions can be imported to generate individual **daily liveweight gain reports**
- Full **drug treatment records**, by individual animal, include **batch numbers, withdrawal periods and costings**
- Drug and Feed **Purchase Register** ensures full stock control
- Monitor which animals are available for slaughter and **avoid missing over-age** cattle

- A **BCMS** Cattle Movements file download will setup your whole herd instantly
- Optional **Barcode Scanner** will speed up inputting of purchased animals and selecting animals to sell
- Send **Passport Applications and Stock Movements** direct from the program to CTS Web Services at BCMS
- **Stock Movement Documents** can be generated for any groups of animals going off the farm
- Comprehensive **Herd Register report** shows all **statutory stock movements** to DEFRA standards
- Take your cattle records outside on a **Smartphone**, review data at any time and **input new events as they happen**
- Run **multiple holdings** on just one program

Starter Version
(Legislative Only)

£ 345

Standard Version
(Full Herd Management)

£ 645

SUM-IT Computer Systems Ltd.
Samuel House, Chinnor Road, Thame, Oxfordshire, OX9 3NU

The most important hallmark for all SUM-IT's Total programs, is that for all they provide, they are SIMPLE-TO-USE. They have all been written with the User in mind, gaining the maximum output from the minimum input and requiring no previous knowledge of computers to operate them. With any Total module purchase receive three months of Gold Level support completely free, this includes support calls on a non-Premium landline and weekly online back-ups of your data.

Optional Modules & Equipment

BREEDPLAN Link Module

Send your pedigree calf registrations direct from the Total Standard Beef Module to any breed society using the BREEDPLAN Database system.
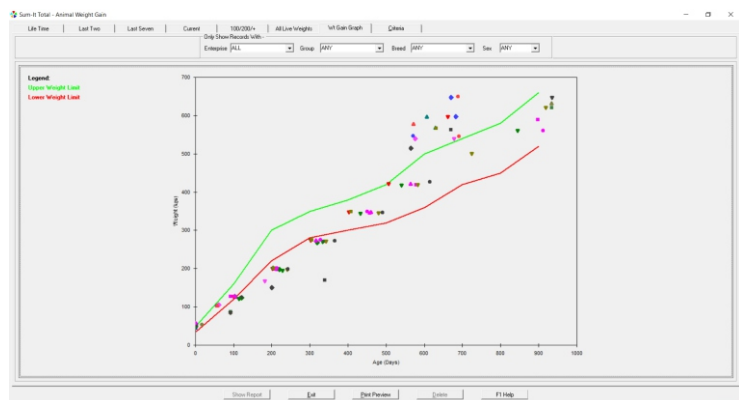

Total Bovine App

Record any event as it happens with the Total Bovine App running on an Android Smartphone or Tablet. This syncs data via Wi-Fi with Total Beef on the computer to either review the status of each animal whilst out and about or input new events, such as calvings, drug treatments and weights as you do them.

Laser Bar Code Readers

Readers can be supplied to speed up data entry from Cattle Passports. They scan the UK Ear Tag, Date of Birth, Sex and Breed instantly to auto-fill the Purchase Screen and can also be used to tag animals for sale.

Electronic Weigher Interface Module

Imports weigh session files from Tru-Test, Gallagher and Iconix weighers into the Total Standard Cattle Module. From the imported weigh data, Daily Liveweight Gains are automatically calculated and a range of reports and scatter graphs can then provide in-depth analysis on the growth rates across individual animals.

Hardware Requirements

Total operates on Windows 10 and Windows Server and will require 500MB of Hard Disk capacity plus an occasional internet connection to receive program updates and communicate with HMRC and BCMS. Hardware should have a minimum of 4GB Ram.

To find out more about how SUM-IT's Total Cattle program can help you, give our Sales team a call on **01844 213003**. They can arrange an on-line or on-farm demonstration and provide demonstration data for you to have a go yourself.

All prices exclude VAT.
