Total Dairy
your dairy management solution

SUM-IT AGRICULTURAL SOFTWARE

Sum-It's Total Dairy Herd Management is designed as a tool to aid both the operation and management aspects of running a dairy herd. Easily accessible data is entered either via the PC or with the Total Cattle App.
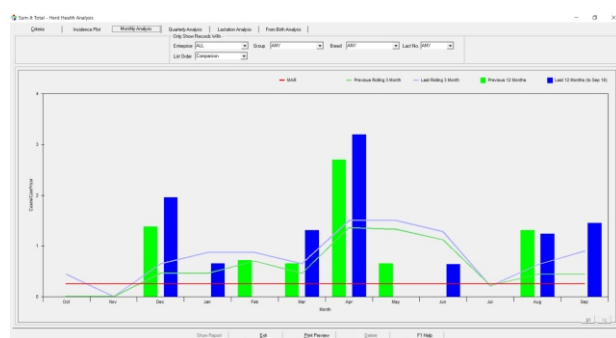

Total Dairy stores past and present individual cow performance records to produce comprehensive reports, providing you with all the information you need to know to make cost-effective and productive decisions. The program updates all legislative and analytical information to maintain user compliance with assurance and regulatory bodies and has the unique ability to integrate seamlessly with the Total Accounts Module for full upgradability when required.

- See complete **individual cow records** at a glance
- Keep milk production on target with **accurate quota predictions**
- **Import milk records** from **QMMS, NMR,** and **CIS**
- Check bloodlines have not crossed in previous generations for **planned matings**
- Show all **statutory stock movements** to DEFRA and Local Authority standards
- Identify **submission** and **conception** rates to analyse your herd's **fertility** in depth
- Send **Pedigree Registrations direct to HUKI** electronically from the program
- Prepare **Action Lists** for the Vet to assist with pre-visit planning

- Access cow records and record actions on an with the **App on an Android device** outside at any time
- Support management and decision making with **up to date fertility** and **cow/ milk performance** reports
- Send **Passport Applications** and **Stock Movements** electronically direct to **BCMS** via the **CTS Web Services**
- **Youngstock records are included** plus sales analysis data for fattening beef animals, along with liveweight gain reports
- Reduce paperwork and comply with legislation by replacing your manual **medicine book** with computerised records for medicine stock and usage

Total Dairy
(Full Herd Management)

£ 695

Price includes 3 months Support and is subject to VAT

The most important hallmark for all SUM-IT's Total programs, is that for all they provide, they are SIMPLE-TO-USE. They have all been written with the User in mind, gaining the maximum output from the minimum input and requiring no previous knowledge of computers to operate them. With any Total module purchase receive three months of Gold Level support completely free, this includes support calls on a non-Premium landline and weekly online back-ups of your data.

Optional Modules & Equipment

Milk Recording Partnerships

Alongside links with NMR and CIS, Quality Milk Management Services (QMMS) provide a very cost-effective and consultative milk testing service.
QMMS combine milk testing results with herd's fertility and health to highlight client improvements to the overall health and performance of their dairy enterprise.

TotalVet

QMMS have designed a universal dairy data analysis tool, developed by SUM-IT, that enables vets, consultants and farmers to look at any herd's records in great depth, identifying trends and providing a benchmarking tool regardless of the source of original herd data.

Parlour Interface Module

Links Total Dairy to many in-parlour recording and heat detection systems so that there is no need for dual input of data. Milk yields can be auto-updated per cow record from the parlour and new feed calculated and sent back with other activities onto the parlour system.

Total Bovine App

Record any event as it happens with an Android Smartphone or Tablet. Sync data via Wi-Fi with Total Dairy on the computer to either review the status of each animal whilst out and about or input new events, such as calvings, drug treatments and weights, as you do them.

Electronic Weigher Interface Module

Import weigh session files from Tru-Test, Gallagher and Iconix into the Total Dairy Module. From the data, a range of reports and scatter graphs are automatically updated providing in-depth analysis and Daily Liveweight Gains across individual animals.

Hardware Requirements

Total operates on Windows 10 and Windows Server and will require 500MB of Hard Disk capacity plus an occasional internet connection to receive program updates and communicate with HMRC and BCMS. Hardware should have a minimum of 4GB Ram.

To find out more about how SUM-IT's Total Dairy program can help you, give our Sales team a call on **01844 213003**. They can arrange an on-line or on-farm demonstration and provide demonstration data for you to have a go yourself.
