

# Total Sheep

your flock management solution

**SUM-IT**  
AGRICULTURAL SOFTWARE

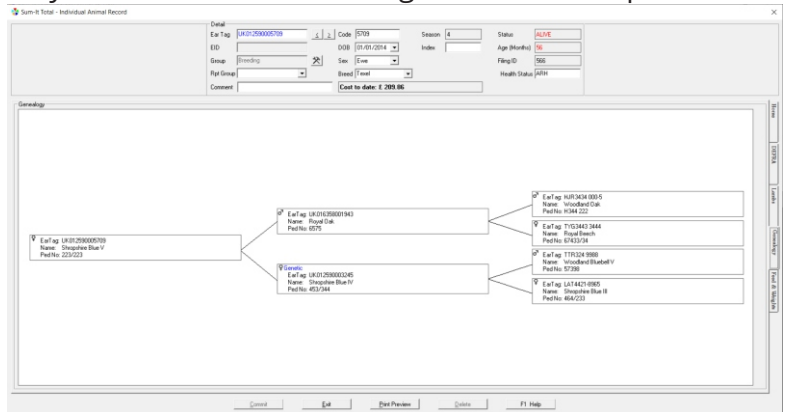

Sum-It's Total Sheep Management programs are designed to handle all aspects of flock recording. Starter Total Sheep will record block activities and movements on a simple flock register/groups basis whereas Standard Total Sheep provides individual animal records.

Both levels help you to comply with regulatory and assurance record-keeping requirements through NOAH Medicine Use and Statutory Movements reports, for example. Each program's unique ability to integrate seamlessly with the Total Accounts Module provides full upgradeability and Total business management when required.

## Total Starter Sheep

- Comprehensive stock **Movements** report identifies total numbers on farm at any date
- Imports lists of tags from **EID Stick Readers** to generate Movement Documents
- Complete **Drug and Feed Registers** record purchase details
- Maintains a full **NOAH Medicine Use report** to Assurance Scheme Standards
- Full **Lamb Sale records** help you analyse final performance figures
- Flock **Gross Margins** available through financial summaries
- Run **multiple holdings** on just one program

**SUM-IT Computer Systems Ltd.**

Samuel House, Chinnor Road, Thame, Oxfordshire, OX9 3NU

The most important hallmark for all SUM-IT's Total programs, is that for all they provide, they are SIMPLE-TO-USE. They have all been written with the User in mind, gaining the maximum output from the minimum input and requiring no previous knowledge of computers to operate them. With any Total module purchase receive three months of Gold Level support completely free, this includes support calls on a non-Premium landline and weekly online back-ups of your data.

## Optional Modules & Equipment

### Total Sheep App

Record any event as it happens with the Total Sheep App running on an Android Smartphone or Tablet. This syncs data via Wi-Fi with Total Sheep on the computer to either review the status of each animal whilst out and about or input new events, such as lambings, drug treatments and weights as you do them.

### EID Readers and Loggers

We supply two types of EID device, catering for both levels of data capture. The EID Reader is a tool that can scan livestock EIDs, store the list on the reader and download it to your PC. The Speedata KT50 EID Logger is a tool that uses RFID technology to scan EID Tags and record data against them.

### Electronic Weigher Interface Module

Import weigh session files from Tru-Test, Gallagher and Iconix weighers into the Total Standard Sheep Module. From the imported weigh data, Daily Liveweight Gains are automatically calculated and a range of figures can then provide in-depth analysis on the growth rates across individual animals.

## Total Sheep Features

Features	Starter	Standard
Statutory Stock Movements	●	●
Sheep EID Movement Records	●	●
Grass Keep Records	●	●
Assurance Scheme Ready	●	●

● = Module has this feature, X = Module does not have this feature, O = Optional Extras. \*Upgrade option to Standard Sheep from Starter Sheep costs £345.

### Hardware Requirements

Total operates on Windows 10 and Windows Server and will require 500MB of Hard Disk capacity plus an occasional internet connection to receive program updates and communicate with HMRC and BCMS. Hardware should have a minimum of 4GB Ram.

To find out more about how SUM-IT's Total Sheep program can help you, give our Sales team a call on **01844 213003**. They can arrange an on-line or on-farm demonstration and provide demonstration data for you to have a go yourself.

All prices exclude VAT.
