TOTAL2 Accounts Launch
Autumn Roadshow Invitation

It was over 20 years ago when SUM-IT, with much fanfare, released Total – the innovative software that was the first and only to integrate all major farm enterprise management into one package.

However, much like your old reliable tractor, software must be improved upon. Requirements have changed, meaning new & improved features are needed – not always compatible with an 'old' design:

- The driver's cab should be more comfortable (clearer screens with scaling to tailor the display)
- The engine needs more horsepower (modern database designs are inherently faster)
- Available for anyone to drive (multi-user access through optional Cloud computing)
- The latest on-board software (generating Accounts details from an invoice 'picture')
- Improved 'linkage' points (ability to import/export more data from/to other data-sources)
- All with the same feel & control that made the SUM-IT 'tractor' so reliable in the first place!

Our Development Team has been hard at work and we are very proud to introduce **TOTAL2**, our new state-of-the-art software, developed on a brand-new agile platform. By design, we have kept the same SUM-IT simplicity, but have spruced up the bodywork while ensuring that you will feel just as at home in the new driving seat! We have retained all the current features and added enhancements, making it flexible so that today's farm management tools are easily amended to meet tomorrow's compliance requirements.

To let you see what we have been working on, we are delighted to announce a series of **23 UK-wide Roadshows**, starting in October, to showcase our **TOTAL2 Accounts** module which will be ready for release in December. We will be showing off all the clever new facilities by demonstrating **TOTAL2 Accounts**.

In addition to Contractor's Diary and Payroll, you will see how the **TOTAL2** Development Plan covers Dairy, Beef, Field and Sheep Modules to further enhance our unique and popular Integration feature. We'll demonstrate how **TOTAL2** will truly be your Hub for all data capture, organisation and management across the farm, streamlining your regulatory obligations and updating all relevant external systems to give you **the best decision-making enterprise management tool** available.

There will be the opportunity for you to order **TOTAL2 Accounts** at a special introductory upgrade price and you can decide whether you wish to convert your existing Total Accounts data mid-year or wait until your financial Year-End to start afresh.

To find out where and when we will be around your area and to book your free place at a Roadshow near you, please **click here**.

We are really excited to be bringing the first **TOTAL2** software module to the thousands of SUM-IT Users across the country and we do look forward to seeing you at one of our Roadshows. Feel free to bring along your neighbouring farmer or contractor too – we're always happy to see new faces!

If you require any further information or have any questions, then please don't hesitate to contact Ben or Caitlyn on 01844 213003.
