

Record past, current and forecast field operations. From the minimum data input, a wide range of analytical reports are auto-populated, including margin per tonne, these are easily exportable to a range of formats. Spray plans can be imported from Gatekeeper to produce work sheets for the Mobile Total Field App. The program's unique ability to integrate seamlessly with the Total Accounts Module provides full upgradability and Total business management when required.

- Record **individual field cropping** records - both inputs and outputs
- Enter data either on the office computer or **via an Android device** in the field
- **Flexible Season Start Markers** handle a variety of crops over **any length of season** - from weeks to decades
- **Switch** between **Acres** & **Hectares** with one button at any time
- Record data quickly through the **Block-booking** facility
- **Analyse** your **costings and yields** by any criteria

- View **complete historical field records**, with **soil analysis**, on screen at any time
- **Compare fields** by crop, variety, soil type etc.
- Keep abreast with **FEPA** and **Assurance Scheme compliance**
- See **accumulated fertiliser analysis** for **NVZs** and **RB209 Data** against each field
- Built-in **Stock Control** keeps tab on store records
- Keep **machinery maintenance** and **Produce Store records** up to date
- Plan **future crop rotations** as far forward as you need

Run **multiple sets of field records** with just one

(simple field recording)

£ 345

(assurance scheme standards)

£ 645

Prices include 3 months Support and are subject to VAT

SUM-IT Computer Systems Ltd.

Samuel House, Chinnor Road, Thame,
Oxfordshire, OX9 3NU

The most important hallmark for all SUM-IT's Total programs, is that for all they provide, they are SIMPLE-TO-USE. They have all been written with the User in mind, gaining the maximum output from the minimum input and requiring no previous knowledge of computers to operate them. With any Total module purchase receive three months of Gold Level support completely free, this includes support calls on a non-Premium landline and weekly online back-ups of your data.

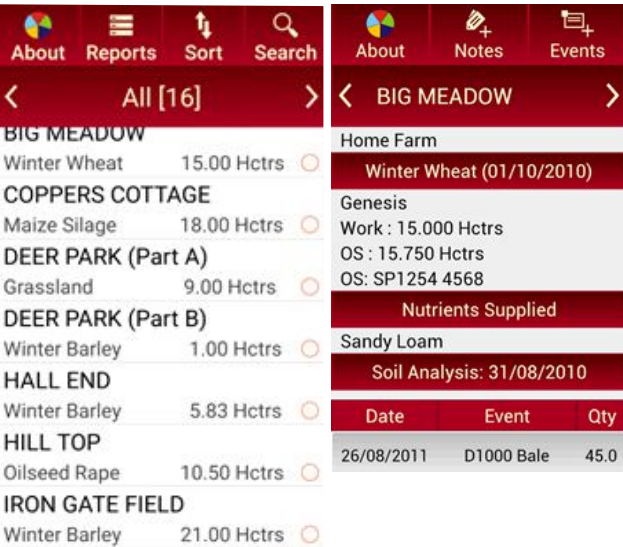

Optional Modules & Equipment

Integrate with Total Accounts

The program's unique ability to integrate seamlessly with Total Accounts provides a full upgrade path when required to eliminate duplicate data entry across multiple programs and tie up all areas of stock control and Accounting.

Total Field App

Record any event as it happens with an Android device. Sync device data via Wi-Fi with Total Standard Field on the computer to either review an up to date summary of what has happened on each field whilst out field walking, view work sheets for relevant fields or input new events, such as spray jobs, as you do them.

Hardware Requirements

Total operates on Windows 10/11 and Windows Server and will require 500MB of Hard Disk capacity plus an occasional internet connection to receive program updates. Hardware should have a minimum of 4GB Ram.

To find out more about how SUM-IT's Total Field program can help you, give our Sales Team a call on **01844 213003**. They can arrange an on-line or on-farm demonstration and provide demonstration data for you to have a go yourself.
