## Your Total Cattle Records Solution

Sum-It's Total Cattle Management program is designed to be a complete beef enterprise management tool to aid with the practical day-to-day control and increasing official, traceability and assurance aspects of the industry.

It provides full enterprise costing facilities, generating gross margins and detailed profit analysis. The program's unique ability to integrate seamlessly with the Total Accounts Module provides full upgradability when required.

Provides **individual animal records** with full identification tags including Dam and Sire IDs, both on your PC and your **smartphone**.

Send your **Passport Applications and Stock Movements** direct from the program to CTS Web Services at BCMS.

Full **drug treatment records**, by individual animal, including **batch numbers and costings**.

Drug and Feed **Purchase Register**, giving full stock control.

**Stock Movement Documents** can be generated for any groups of animals going off the farm.

Monitor which animals are available for slaughter, identify **drug withdrawal end dates**, and **avoid missing over-age cattle** before it's too late.

Software works with optional **Barcode Scanner** to speed up inputting purchased animals and selecting animals to sell.

**Download** of Cattle Movements from **BCMS** will setup your whole herd instantly.

Automatically maintains full **unlimited pedigree records** and can back-fill data from **BREEDPLAN** records.

Weighings can be input to generate individual **daily liveweight gains**.

Comprehensive **Herd Register report** shows all **statutory stock movements** to DEFRA standards.

Take your cattle records outside on a **Smartphone**, review data at any time and **input new events as they happen**.

Run **multiple holdings** on just one program.
